| Product Name: Fmoc-S-acetamidomethyl-L-cysteine-Wang Resin, Synonym: Fmoc-L-Cys(Acm)-Wang Resin |                                                                                     |
| Catalogue No.: SICC7-001                                                                        | CAS No.: N/A                                                                        |
| Structure:                                                                                      |  |

|                                  |                                          |
|----------------------------------|------------------------------------------|
| Appearance                       | Off-white to light yellow to beige beads |
| Bead size (Mesh)                 | 100 - 200                                |
| Degree of cross-linking (% DVB)  | 1                                        |
| Substitution (mmol/g)            | 0.3 - 0.8                                |
| Loss on drying (%)               | ≤ 2.0                                    |
| Degree of swelling in DCM (ml/g) | 5.0 - 8.0                                |
| Degree of swelling in DMF (ml/g) | 4.5 - 8.0                                |
| Storage (°C)                     | 2 - 8                                    |
